

Dear Ladies and Gentleman: Please don't change a thing with amateur radio, but support RM-10868 if you do. All our values and standards are being eroded from government down to the home. Please keep our hobby respectful. Any disabled person, either mentally or physically can obtain a license now, even 6 year old children. Surely you don't think that a 6 year old child is wise enough to make broad value based decisions or possess any knowledge of electronics compared to someone in their teens to late adulthood? People are wanting something for nothing and you have been catering to them. Quit comparing us to the world. We are the freest, fairest, and as smart a country as we need be. We don't need to compete with God. Leave that to the others. Keep our standards intact which this petition does as close as any, but I hope you want make any changes at all. Thanks, from a 40 plus year "ham" that loves to see young people enter the hobby but not given the hobby. Wayland Bradley k4ws
